## **DETAILED ACTION**

### ***Specification***

The Specification is informal in layout. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
  - (1) Field of the Invention.
  - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

### ***Claim Rejections - 35 USC § 112***

Claims 1-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 1, clear and positive antecedent for the "resulting differential curves" (line 10) should be defined. In regard to claim 2 and 3, clear and positive antecedent for the "computation" (line 2) should be defined. In regard to claim 5 and 6, clear and positive antecedent for the "first pressure level" (line 2) and the "second pressure level" (line 3) should be defined. In regard to claim 8 and 9, clear and positive antecedent for the "first volume flow" (line 2) and the "second volume flow" (line 2 and 3) should be defined. In regard to claim 13, clear and positive antecedent for the "spontaneous respiratory behavior" (line 3) should be defined. In regard to claim 14, clear and positive antecedent for the "ventilation" (line 4) should be defined. In regard to claim 16, clear and positive antecedent for the "measurements" (line 2) should be defined. In regard to claim 17, Applicant's use of terminology such as "can be" (line 9) renders the claim indefinite and should be avoided.

Applicant is respectfully requested to review all claims of record for occurrences similar to that detailed above.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Dellaca' et al. and Estes et al. references pertain to respiratory systems.

Claims 1-29 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
